

TUTORIAL ON USB FORENSICS AND STEGANOGRAPHY

What is steganography?

Step 1: Download the .dd image for the rhino forensics analysis from: https://cfreds-archive.nist.gov/dfrws/Rhino_Hunt.html

Step 2: Extract the deleted crocodile image and alligator from the data image using the autopsy tool

(look like this):

Step 3: Using the following tools in linux:

- Stegdetect
- steghide
- stegseek
- jphide
- jpseek and
- password cracking tools

To detect, hack the passkey (used for steganography) and extract images of rhinos hidden in the alligator and crocodile images.

QnA

What were the passwords, used for the hiding and extracting the images in the alligator and crocodile images?

Show us the extracted (hidden images).
